REASONS FOR ALLOWANCE.

1. This is an Examiner's statement of reasons for allowance. The closest prior art Zank et al U.S. Pat. No 6,307,955 discloses an electronic signature management system that includes a graphic tablet digitizer for signaling position coordinates of stylus being moved to produce a handwritten signature.

IBM Technical Disclosure Bulletin discloses a selective receipt of document elements in an electronic mail system.

JP358044583A Ohara, Hideo discloses a receipt printing system of electronic cash register.

However, neither Zank nor IBM Technical Disclosure Bulletin and Ohara singularly or in combination fail to anticipate or render obvious the recited feature:

As per claims 1 and 33" determining whether said third biometric data matches one of plurality of authorizing biometric data in said database, wherein said plurality of authorizing biometric data represents registered biometric data for one or more users that authorized to receive a refund for said transaction item, and authorizing said refund request upon retrieval of said stored electronic transaction receipt, wherein said stored electronic transaction receipt is retrievable if said third biometric data matches one of said plurality of authorizing biometric data, said refund transaction being completed using said electronic transaction receipt in place of a paper receipt".

Art Unit: 3621

As per claim 23 " if said comparison indicates a match, storing information related to a financial transaction as an electronic transaction receipt, wherein said electronic transaction receipt is retrievable in a subsequent refund transaction upon a determination that third biometric data presented by a user, matches one of plurality of authorizing biometric data in said database, wherein said plurality of authorizing biometric data for one or more users that are authorized to receive a refund, said electronic transaction receipt is used as proof of said financial transaction".
